Terms and Notes

Definitions, footnotes, and citations

Input Data supplied to a model.

Output A prediction returned by the model.

A short statement with a source[1] and a bibliography citation [1].

Equation (3) is defined in the mathematics section.

[1] Use footnotes for brief notes.

Blocks

Remark

General information.

Important

A point that needs attention.

Example

A concrete example.

Columns and Images

Left column

- Explain the figure here.
- Use `\textwidth` for local width.

Figure caption.

Equations

Inline math: $E = mc^2$.

$$f(x) = \frac{1}{\sqrt{2\pi\sigma^2}} \exp\left(-\frac{(x-\mu)^2}{2\sigma^2}\right)$$

$$y = ax + b, \tag{1}$$

$$\mathbf{Ax} = \mathbf{b}. \tag{2}$$

Matrices and Piecewise Functions

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} \begin{pmatrix} x_1 \\ x_2 \end{pmatrix} = \begin{pmatrix} y_1 \\ y_2 \end{pmatrix} \tag{3}$$

$$f(x) = \begin{cases} x^2, & x \geq 0, \\ -x, & x < 0. \end{cases}$$

Tables

Method	Value	Uncertainty
A	1.23	0.04
B	2.34	0.05

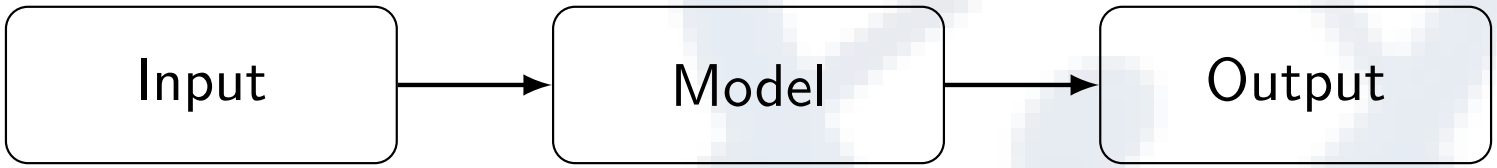

Figures and Cross-References

Figure: Example figure caption.

Figure 1 illustrates a labeled image.

Simple Workflow

Progressive Reveal

- First point

Progressive Reveal

- First point
- Second point

Progressive Reveal

- First point
- Second point
- Third point

Code

```
for i in range(3):
    print(i)
```

References

[1] Author, *Title*, Journal (Year).

Appendix

- Supporting calculations or extra results for questions.
- Keep the main presentation focused on the key findings.
